3 panel (6 page) roll-folded insert

In the 'zip' file for the **3 panel roll-folded insert** you will find three common graphic file formats (.ai, .eps and .pdf) for your design use.

There are two templates provided for each file format. One template is designated for the 'front' design, and one template is designated for the 'back' design.

IMPORTANT: For this specific insert you cannot use the same template file to design the front of the insert and the back of the insert. Please ensure you use the 'front' and 'back' templates as required, otherwise your design will not match the folding pattern properly.

Questions? Please call or e-mail!

'Front' of the insert

	BACK COVER	FRONT COVER
--	---------------	----------------

'Back' of the insert

FRONT COVER	BACK COVER	
----------------	---------------	--
